David P. Driscoll  
Commissioner of Education

September, 2003

Dear Friends:

I am pleased to issue the annual publication, *Plans of High School Graduates: Class of 2001*. This report provides information on the post-graduation plans of Massachusetts public high school students who graduated in 2001. The data in this document, along with several other educational indicators that we report, help to inform decision-making at both local and state levels.

For the Class of 2001, over 76 percent of Massachusetts high school graduates plan to continue their education at a two- or four-year college. This figure has shown steady growth from 53 percent recorded over twenty years ago. Correspondingly, 14 percent of graduates plan to work, approximately half of the percentage planning to work in 1980.

The Education Reform Act of 1993, with its high standards for students and teachers, will strengthen the efforts of Massachusetts schools and districts in preparing students to successfully pursue their post-graduation plans.

If you have any questions or suggestions regarding this report, please contact:

Massachusetts Department of Education  
Information Services and Technology  
350 Main Street  
Malden, MA 02148

Sincerely,

A handwritten signature in black ink, appearing to read "D. P. Driscoll", written in a cursive style.

David P. Driscoll  
Commissioner of Education

## Introduction

The Massachusetts Department of Education collects data annually from public high schools regarding the plans of their graduates. This report summarizes the data at the state level for the Class of 2001 and includes analyses by racial/ethnic groups and gender. Comparison data from past years are also provided, as well as district and individual school data. It is important to note that the data represent the intentions of high school graduates and may not reflect what students actually do after graduating from high school.

## Results

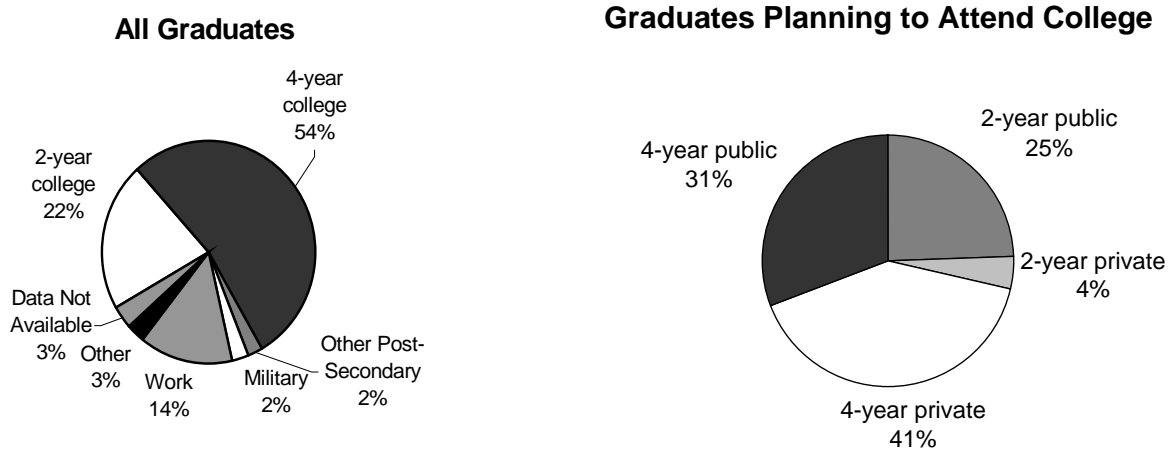

### • The Class of 2001

In 2001, a total of 54,391 students graduated from Massachusetts public high schools. Of these graduates, over 77 percent planned on attending college or some other post-secondary institution (e.g. trade schools), 14 percent planned on working, and two percent intended to enter the military. Three percent of the graduates reported having plans other than the ones listed above, and data was not available for the remaining three percent of graduates (Figure 1 below and Table 1). Of the graduates planning to attend college, more than twice as many planned to attend a four-year college than planned to attend a two-year college (54 versus 22 percent of all graduates).

**Figure 1. Plans of 2001 High School Graduates\***

Of the total number of graduates:

- 75% planned to attend college
  - Private four-year college – 31%
  - Public four-year college – 23%
  - Public two-year college – 19%
  - Private two-year college – 3%
- 14% planned to work
- 2% planned to enter the military
- 2% planned to attend other post-secondary schools

\* Some totals and percentages may not sum equally due to rounding.

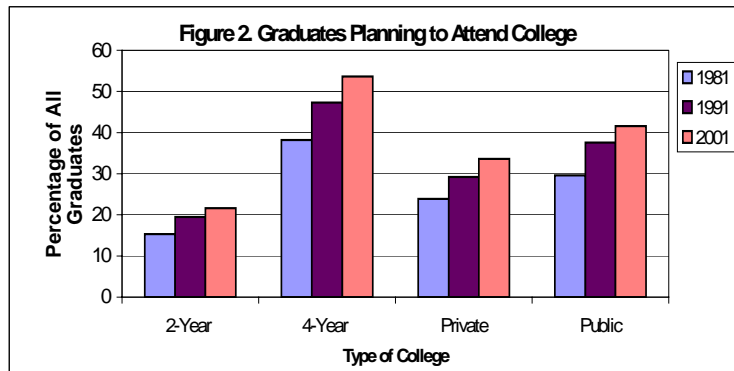

**Table 1. Plans of High School Graduates: Class of 2001**

	Number of Graduates	Percentage of Graduates by Plans							Data Not Available

Note: Some percentages may not sum to 100 due to rounding.

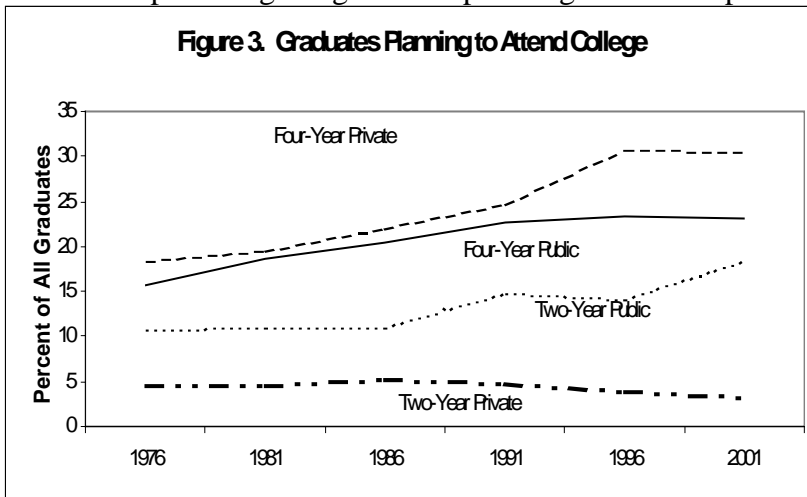

• **Trends over Time**

The percentage of graduates planning to attend college has increased over the past twenty years, from 54 percent in 1981, to 67 percent in 1991, and to over 75 percent of all graduates in 2001 (Table 2). Between 1981 and 2001, the percentage of graduates planning to attend a two-year college increased from 15 percent to 22 percent, and the

percentage planning to attend a four-year college rose from 38 percent to 54 percent. Over that same time period, the percentage of high school graduates intending to enroll in a private college increased from 24 to 34 percent, and the percentage intending to enroll in a public college increased from 29 percent to 42 percent (Figure 2).

While the percentage of graduates planning to attend a private two-year college has remained

mostly steady since 1976, the percentage planning to attend public two-year colleges has grown considerably from 11 to 19 percent (Figure 3). The percentage of graduates planning to attend public four-year colleges has shown a general increase over the past 25 years. From 1976 to 2001, the percentage of graduates planning to attend a private four-year college has shown the highest increase, from 18 to 31 percent.

As the percentage of graduates planning to attend college has increased, the percentage of graduates planning to work, attend some other post-secondary institution, or enter the military has decreased (Figure 4). The percentage of graduates planning to work fell from 31 percent in 1981 to 14 percent in 2001. The percentage of graduates planning to attend a non-

1978	78,348	10.2	17.2	4.0	19.3	5.2	3.8	32.2	5.0	3.1		
1977	72,393	11.0	16.5	4.2	19.3	5.5	4.2	31.8	4.8	2.7		
1976	75,386	10.7	15.6	4.5	18.4	5.7	4.0	30.8	6.6	3.7		
1975	78,408	11.1	16.4	4.2	17.5	5.6	4.0	30.9	6.1	4.3		

college, post-secondary institution decreased from six to two percent, and the percentage planning to enter the military decreased from four to two percent over the same time period.

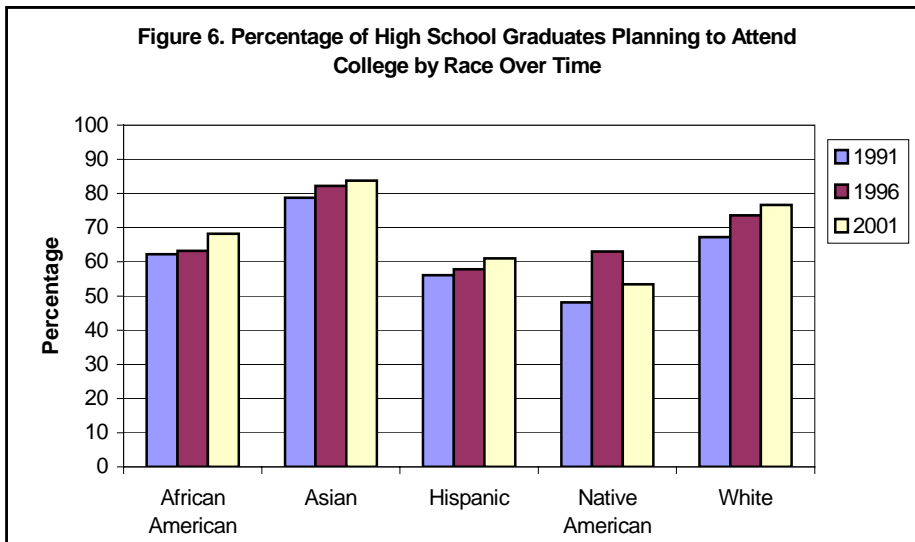

• **Racial/Ethnic Groups**

Post-graduate plans also varied according to racial/ethnic group (Figure 5). In 2001 the percentage of Asian graduates planning to attend a two- or four-year college (84 percent) was higher than that of white graduates (77 percent), African-American graduates (68 percent), Hispanic graduates (61 percent), and Native American graduates (53 percent).

The percentage of graduates planning to attend public colleges ranged by race/ethnicity from 35 percent (Native American) to 43 percent (Hispanic). The percentage of those planning to attend private colleges ranged from 18 percent (Hispanic) to 42 percent (Asian).

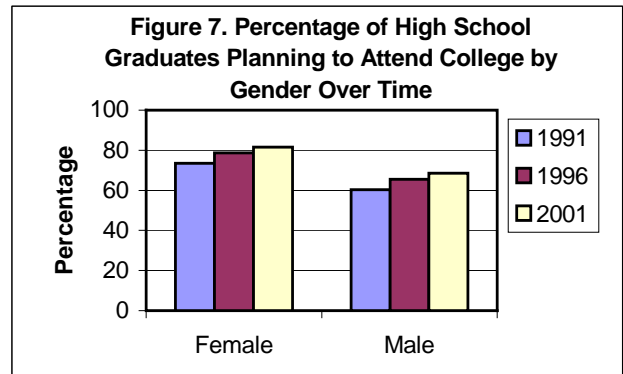

For each race reported, the percentage of graduates planning to attend college has increased over the past ten years (Figure 6). Between 1991 and 2001, the percentage of Asian graduates planning to attend college increased from 79 to 84 percent. For whites, the percentage increased from 67 to 77 percent;

for African-Americans, the percentage increased from 62 to 68 percent; for Hispanics, the percentage increased from 56 to 61 percent. For Native Americans, the percentage increased from 48 to 53 percent over the past ten years, but this increase has not been as steady as for the other racial/ethnic groups.

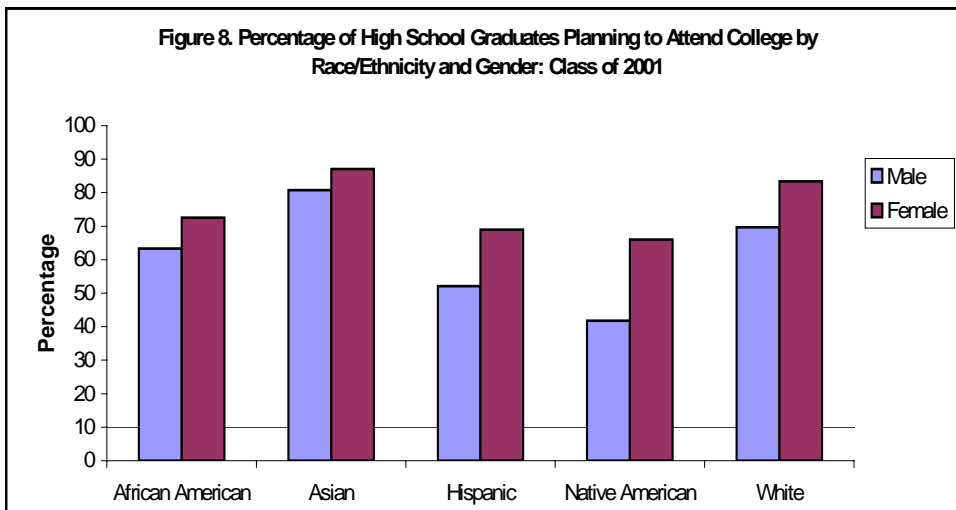

• **Gender**

In the 2001 graduating class, 82 percent of female graduates planned to attend a two- or four-year college, compared to 69 percent of male graduates, while a higher percentage of male graduates than female graduates (18 versus 10 percent) intended to work (Table 1). Over four times as many males as females planned to enter the military (approximately 4 to 1 percent). These differences extend a gender pattern seen in recent years. In the last ten years, females have consistently planned to attend college at a higher rate (approximately thirteen percentage points) than males, but each gender has increasingly planned to attend college over this time period (Figure 7).

• **Race/Ethnicity and Gender**

The disparity between the percentages of female and male graduates planning to attend college also varies by race/ethnicity (Figure 8). In each racial/ethnic group, the percentage of female

graduates planning to attend college was higher than that of male graduates. The largest difference is among Native American graduates, with 66 percent of Native American female graduates having planned to attend college compared to 42 percent of

Native American male graduates (a difference of 24 percentage points). The smallest difference was among Asian graduates: within this group 87 percent of female graduates and 81 percent of male graduates planned to attend college.

- **Data Collection and Reporting by Individual Schools and Districts**

Data about the plans of high school graduates were obtained from the Year-End School Indicator Report, a survey of Massachusetts public schools conducted by the Department of Education at the end of every school year. School officials report the number of graduating students by gender and race across nine categories of post-graduation plans. High schools reported in the data table, Plans of High School Graduates: Class of 2001, starting on page 8 are classified as follows:

- Academic High Schools (A) – offer academic courses, both college preparatory and general
- Comprehensive High Schools (C) – offer academic courses and at least five Chapter 74 approved occupational education programs.
- Vocational High Schools (V) – offer Chapter 74 approved vocational-technical education programs.
