Dear Friends,

I am pleased to issue the annual publication, *Plans of High School Graduates: Class of 1999*. This report provides information on the post-graduation plans of Massachusetts public high school students who graduated in 1999. This information, along with several other educational indicators we report, helps to inform decision-making at local and state levels. The information will be useful to educators, policy-makers, and the general public in ensuring that Massachusetts students are prepared to graduate from high school with the knowledge and skills necessary for productive and successful lives.

For the Class of 1999, 73 percent of Massachusetts high school graduates plan to continue their education at a two- or four-year college. This figure has shown steady growth from 51 percent over the past twenty years. Correspondingly, 16 percent of graduates planned to work, half of the percentage planning to work in 1979.

The Education Reform Act of 1993, with its high standards for students and teachers, will strengthen the efforts of Massachusetts schools and districts in preparing students to successfully pursue their post-graduation plans.

If you have any questions or suggestions regarding this report, please contact:

Note: Some data may vary slightly from the hard copy due to corrections made by districts after printing.

The Massachusetts Department of Education collects data annually from high schools regarding the plans of high school graduates. The following report summarizes this data at the state level for the Class of 1999 and includes analyses by racial/ethnic groups and gender. Comparison data from past years are also provided, as well as individual school and district data. It is important to note that the data represent the *intentions* of high school graduates and may not reflect what students actually do after graduating from high school.

In 1999, a total of 51,465 students graduated from Massachusetts public high schools. Of these graduates, 75 percent planned on attending college or some other post-secondary institution, 16 percent planned on working, and two percent intended to enter the military (Figure 1 and Table 1). Of the graduates planning to attend college, nearly three times as many planned to attend a four-year college than planned to attend a two-year college (53 versus 20 percent of *all* graduates).

Figure 1. Plans of 1999 High School Graduates

Of the total number of graduates:

- 73% planned to attend college
 - ♦ Public 4-year college - 22%
 - ♦ Private 4-year college - 31%
 - ♦ Public 2-year college - 17%
 - ♦ Private 2-year college - 3%
- 2% planned to attend other post-secondary schools
- 16% planned to work
- 2% planned to enter the military

Gender

In the 1999 graduating class, 80 percent of female graduates planned to attend a two- or four-year college, compared to 67 percent of male graduates, while a higher percentage of male graduates than female graduates (20 versus 12 percent) intended to work. Over four times as many males as females planned to enter the military (approximately 4 versus 1 percent). These differences extend a gender pattern seen in recent years.

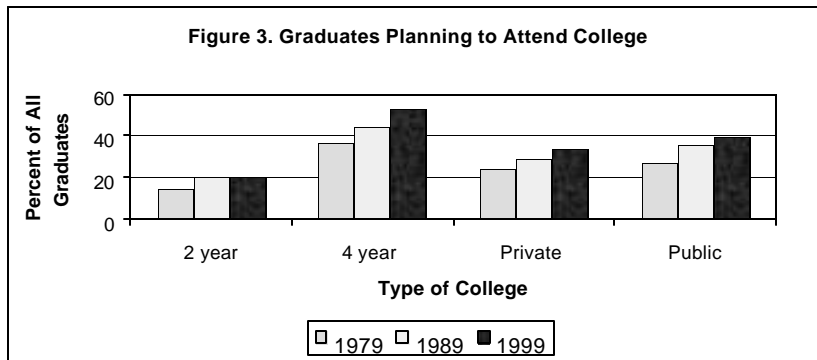

Racial/Ethnic Groups

Post-graduate plans also varied according to racial/ethnic group (Figure 2). The percentage of Asian graduates planning to attend a two- or four-year college (82 percent) was higher than that of white graduates (75 percent), African-American graduates (65 percent), Hispanic graduates (56 percent), and Native American graduates (51 percent). All racial groups except Native Americans showed an increase from last year – the largest increase being for African-American graduates (9 percentage points). While comparisons by race of the percentage of graduates planning to attend public colleges varied only slightly, the rates for those planning to attend private colleges show more substantial variations between racial/ethnic groups.

Trends over Time

The percentage of graduates planning to attend college has increased over the past twenty years, from 51 percent in 1979, to 64 percent in 1989, and to 73 percent of all graduates in 1999 (Table 2). Between 1979 and 1999, the percentage of graduates planning to attend a two-year college increased from 15 to 21 percent, and the percentage planning to attend a four-year college rose

from 37 to 53 percent. Over that same time period, the percentage of high school graduates intending to enroll in a private college increased from 24 to 34 percent, and the percentage intending to enroll in a public college increased from 27 to 40 percent (Figure 3 and Figure 4).

While the percentage of graduates planning to attend a private two-year college has remained mostly steady in recent years, the percentage planning to attend public two-year colleges has grown slightly. The percentage of graduates planning to attend public four-year colleges had shown a general increase over the past 23 years; however, this percentage did decrease in 1999.

From 1975 to 1999, the percentage of graduates planning to attend a private four-year college has shown the highest increase, from 18 percent to 31 percent.

As the percentage of graduates planning to attend college has increased, the percentage of graduates planning to work, attend some other post-secondary institution, or enter the military has decreased (Figure 5). The percentage of graduates planning to work fell from 33 percent in 1979 to 16 percent in 1999. The percentage of graduates planning to attend a non-college post-secondary institution decreased from five to two percent, and the percentage planning to enter the military decreased slightly from four to two percent over the same time period.

Data Collection and Reporting by Individual Schools and Districts

Data about the plans of high school graduates were obtained from the *Year-End School Indicator Report*, a survey of Massachusetts public schools conducted by the Department of Education at the end of every school year. School officials report the number of graduating students by gender and race across nine categories of post-graduation plans.

High schools reported in the table Distribution of High School Graduates – Class of 1999 at the end of this report are classified as follows:

- ♦ Academic high schools (A) offer general and college preparatory courses.
- ♦ Vocational high schools (V) offer Chapter 74 approved vocational-technical education programs.
- ♦ Comprehensive high schools (C) offer academic courses and at least five Chapter 74 approved occupational education programs.
